

2021 Chronic Condition Enhanced Prescription Drug List

Plans with the **IRS- allowed Chronic Condition Enhanced Prescription Drugs** rider only

List of covered drugs available before deductible for plans with the rider.

Please read: This document contains information about the drugs we cover in this plan. Coverage levels are defined by your plan documents, inclusion on this list does not mean that these prescriptions are covered at 100%. Refer to your plan documents for full coverage details.

Important: Total Health Care requires the use of an A-rated generic drug when one is available. Step- therapy and prior authorization requirements may apply to certain medications. You may be responsible for additional cost sharing when choosing a non-preferred brand name medication over an available generic.

Check your Total Health Care coverage documents and riders to find out if any approved drugs are not included. Always refer to your plan documents for full coverage details. For the most current information regarding this rider or our approved drugs, please refer to the “4-Tier Commercial High Deductible Health Plan Approved Drug List” at <https://thcmi.com/pharmacy>.
